

HGL series Load isolation switch

Model & Meaning

H GL - A / JK B H
① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨

① Code of company.

② Code of load isolation switch.

③ Conventional thermal current.

Z stands for change-over load isolation switch
(Z1-outlet, Z2-inlet)

C stands for side operated load isolation switch.

④ Number of poles:

3 poles, 4 poles (3 poles+one on and off neutral pole)

⑤ Operation outside, no note for front operation.

⑥ The window for direct observing the contact, do not mark without need.

⑦ Functional code of auxiliary contact (as show in the table), do not mark without need.

⑧ The connection behind the board. Connection in front of board is not marked.

⑨ Operation behind the board, do not mark without need.

One NO One NC	F11	F1NO+F1NC
Two NO Two NC	F12	F2NO+F2NC

Application scope

HGL series load isolation switch mainly suitable for AC 50Hz, rated voltage to 660V, DC rated voltage up to 440V, rated current up to 3,150A. The switch is used in the infrequent making and breaking circuit.

Example of model selection

HGLZ2-160A/4Z₂JF₁₁~380V In 125A

Change over load isolation switch, inlet, AC rated voltage 380V, Conventional thermal current 160A, rated current 125A, 4 poles, operation outside the board, auxiliary contact NO+NC.

Characteristics of products

- ※ The elastic-accumulating accelerating mechanism for instant release realizes the rapid making and breaking (13.8m/s), having no relation ship with the speed of the operating handle, and increasing greatly the capability of extinguishing electric arc.
- ※ The shell made of unsaturated polyester resin reinforced by glass fibre possesses excellent performance of flame resistant, dielectric performance, safe operation, resist carbonic performance and resist impact performance.
- ※ Parallel double gap contact possesses self cleaning functions.
- ※ All the contact materials are copper alloy plated with silver, and possess two separation contact surfaces. Large clearance of insulation.
- ※ Be on "O", the products can lock the handle with three locks at the same time and thus can avoid error operation.

HGL series Load isolation switch

Conformed standard

International standard

IEC60947-1 (1998) «Low-voltage switchgear and controlgear, part one: General Rules».

IEC60947-3 (1999) «Low-voltage switchgear and controlgear, switches, disconnectors, switch-disconnectors and fuse-combination units».

National standard

GB/T14048.1-2000 «Low-voltage switchgear and controlgear, part one: general Rules».

GB/T14048.3-2000 «Low-voltage switchgear and controlgear, switches, disconnectors, switch-disconnectors and fuse-combination units».

Load isolation switch of HGL-63~3150A

7 specifications of HGL load isolation switch from 63A to 3150A: Basic model of modularized design, 3 poles, 4 poles (3 poles+on and off neutral pole). It is suitable for the making and breaking operation of electric circuit or electric isolation. Switches over 1000A are only suitable for electric isolation.

Mark window is set in the front side to indicate the on and off state of the contact.

Rear observation window can be provided according to the demand to observe directly the on and off state of the contact, for window pattern, refer to the back operational load isolation switch, HGL-63~1600A/H.

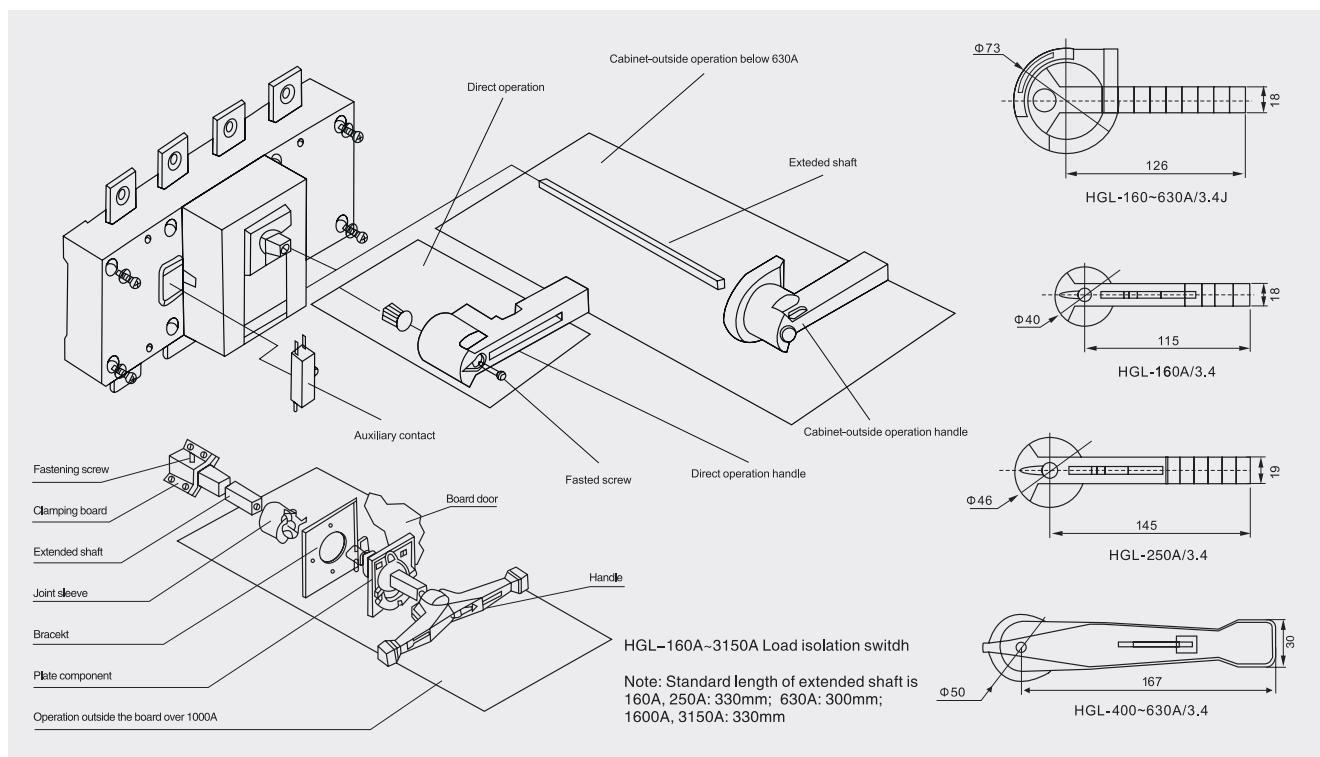

Two group of auxiliary contacts can be assembled.

The electric cable insulating cover can be assembled.

Operation mode

※ Direct operation: The handle is installed in the middle of the switch.

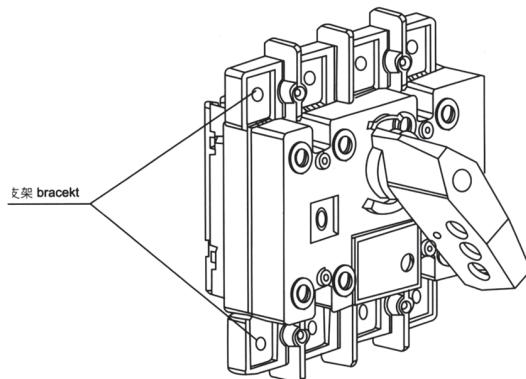

※ Operation outside the board: The handle is installed outside the door off distributing board.

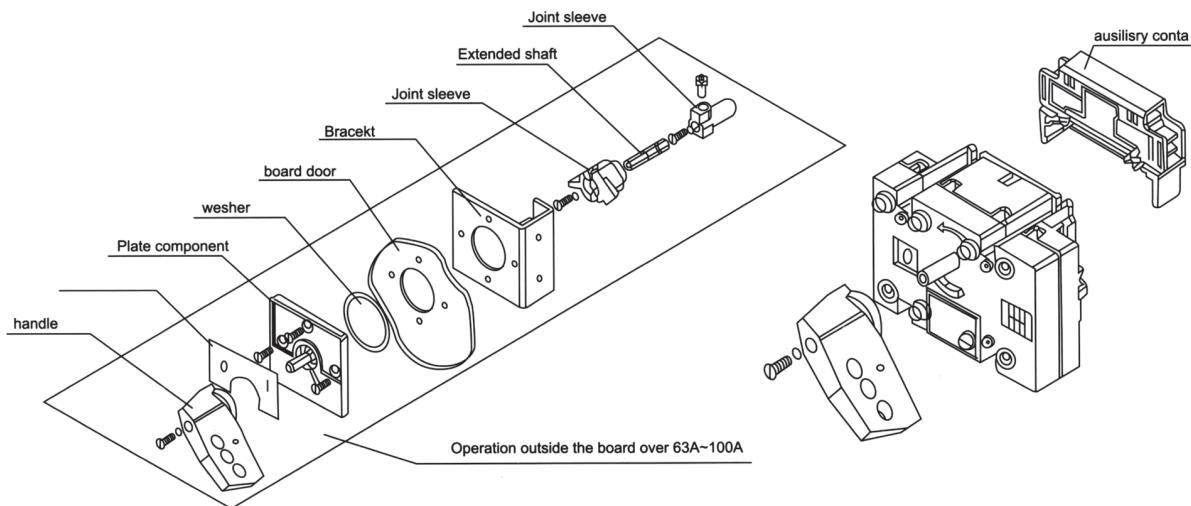

HGL series Load isolation switch

Load isolation switch of HGL-63A~100A

- ※ 63A~100A is suitable for the making and breaking of electrical isolation circuit or electric insulation.
- ※ 63A~100A possesses 3 poles, and 4 poles (3 poles+on of neutral pole).
- ※ Two sets of auxiliary contacts can be assembled according to demand.
- ※ Side operation, operation outside, the board can be assemble according to demand.

Note: It's HGL-100A~630A loading islation switch which is no span

- ※ 63A~100A is suitable for the making and breaking of electrical islation circuit or electric insulation. Two sets of auxiliary contacts can be assembled according to demand.
- ※ 63A~100A possesses three poles, and four poles (3 poles+on of neutral pole). Side operation, operation outside, the board can be assemble according to demand.
